

## Embroidery Size Selections

### A Note About Sizes:

The sizes you view on your screen may not be the actual size, as display sizes can vary on different monitors. For best results look at an actual ruler. The “size” is the height of the capital letter (as displayed on the right).

You can also print this page on 8.5” x 11” paper at 100% actual size, and this should be close to accurate, although it would still be best to verify with a ruler.
